DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Regarding claim 16, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1, 4-7, 12 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 2268043A. GB2268043 discloses an audio hat connection assembly for connecting to hat material, said assembly comprising: a first section 30; a second section 32 having a cavity adapted for storing items (29, 50, 52 and 54), at least one audio speaker and means for producing audio 29 being stored in said cavity; means for joining said first section and said second section; and means for mounting the assembly to the hat material (see page 8, lines 8-20, the assembly is sewn to together to enclose the first and second sections and form a bill of the hat).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4-6, 8, 12 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Peng. Peng discloses an audio hat connection assembly for connecting to hat material, said assembly comprising: a first section 2; a second section 111 having a cavity adapted for storing items (12, 13, 14, 16 etc.), at least one audio speaker and means for producing audio (13 and 16) being stored in said cavity; means for joining said first section and said second section (11 and 112); and means for mounting the assembly to the hat material (see figures 1 and 2, the audio assembly is attached to a bill of a hat). Regarding claim 16, means for storing personal items can be construed as the cavity formed by the first and second section.

Allowable Subject Matter

3. Claims 2-3, 9-11, 13-15 and 17-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

BEST AVAILABLE C.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wolfe et al discloses a cap having audio means.
